

UFMCA

Undersink Drinking Water System for Kitchen Faucet

Rainfresh **UFMCA** Drinking Water System is designed to deliver clean and better quality drinking water at a fraction of the cost of bottled water. It is an undersink filter that connects to the cold water line of the kitchen faucet. **UFMCA** is ideal for urban homes that are on municipally treated water treated with chloramines or chlorine

PROTECTS AGAINST

- Chloramines
- Chlorine
- Sediment

Over 11 million Canadians drink water that has been treated with chloramines (Chlorine + Ammonia). Chloramines render an offensive taste and odour to drinking water & beverages made from such water. Chloramines can cause skin irritation, are corrosive by nature, and are toxic to fish.

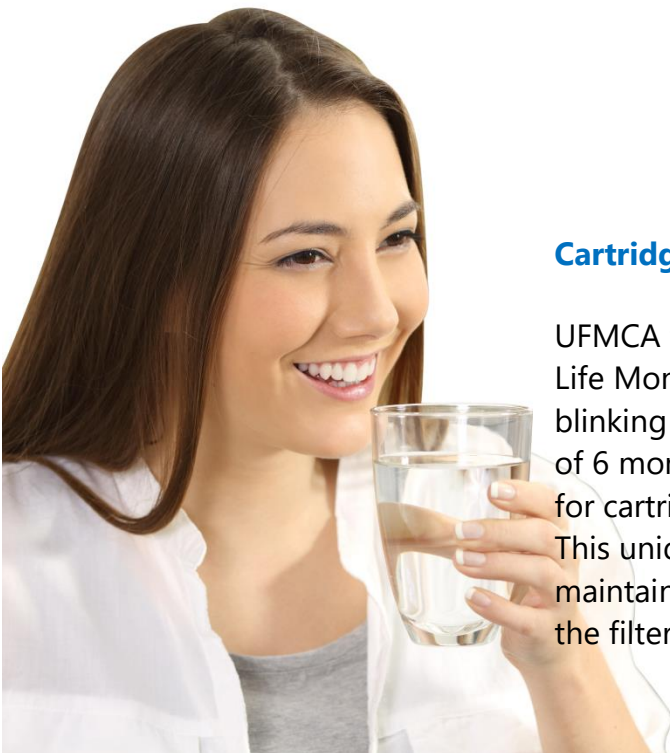

Easy Cartridge Change

Just grab sump by hand, turn and remove.
No tools required!

Cartridge Life Monitor

UFMCA features a "Cartridge Life Monitor" that sets off a blinking LED light at the end of 6 months signalling time for cartridge replacement. This unique feature helps maintain the efficiency of the filter system.

Installation Notes

Unit Width	Unit Height	Unit Depth	Connections
5"	12.5"	5"	3/8" Quick connect

Connector kit (mounting bracket, tubing & fittings) included

Specifications

- Model : UFMCA
- Rated Flow : 0.5 US GPM (1.9 LPM)
- Chloramine removal efficiency : > 99% at rated flow
- Feed Water Pressure : 20 to 100 psi* (137 to 689 kPa)
- Water Temperature : 4°C to 37°C (39 to 100°F)
- Replacement Filter Cartridge Model : CA1 (5 micron nominal), included
- Cartridge Life : 1,000 US Gal** (6 months)
- For use with (pipe material) : Copper, PEX or CPVC. Connector kit included
- BPA-free materials

CA1

* If water pressure exceeds the rated pressure, a pressure regulator must be installed before the filter housing. It is recommended that the pressure regulator be set at 75 psi or less. Not for use in multi-storeyed buildings over 4 storeys high.

Do not use with water that is microbiologically unsafe or of unknown quality, without adequate disinfection before the system. For effective disinfection we recommend Rainfresh whole house UV disinfection systems.

** Cartridge life is directly dependent on water conditions. High sediment levels or water use may cause more frequent replacement

Tested & certified by CSA Group to NSF/ANSI 42, to CSA B483.1 and to NSF/ANSI 372 for lead-free requirements

5 year limited warranty
