

IM200

Inline External Fridge Filter

Rainfresh IM200 is a high performing, inline, easy-to-install water filter that reduces chlorine and odours from drinking water and improve its taste. It is designed with high-quality materials that provide certified superior filtration performance.

Featuring an easy to connect design, Rainfresh IM200 inline filter is an excellent & economical choice for ice-makers and refrigerators. It can be installed easily on the 1/4" water line that feeds water to the fridge.

It can also be used as a post-filter for undersink reverse osmosis systems, coffee machines and water coolers to provide better quality water.

FEATURES

- High quality activated carbon for excellent contaminant reduction
- Injection molded food-grade virgin polypropylene body
- Inlet & outlet filter screens to eliminate media channeling
- Precision cut threaded connections for accurate, repeatable threads to eliminate leaks
- Rigid and sturdy construction

SPECIFICATIONS

Model	Max Flow GPM	Max Pressure [✓]	Max Temp	End Connections	Service Life	Approx Size
IM200	0.50 (1.89 LPM)	100 psi (6.8 bar)	100°F (38°C)	1/4" Quick Connect*	1,000 Gal (3,785 L)	10.5" (L) x 2" (dia) (26.6 cm x 5 cm)

[✓] - If water pressure exceeds 100 psi at any time, unit must be installed with a pressure regulator and water hammer arrestor. Pressure regulator must be set for 75 psi or less.
