

# SWH Series

## Hot Water Filter Cartridges

Rainfresh SWH series filter cartridges are string-wound depth filters with a stainless steel core, designed for efficient removal of particulate matter and fine sediment from hot water. These cartridges provide an efficient, cost effective filtration solution for applications like process water, HVAC systems, hydronic heating systems, etc.

### BENEFITS

- Higher Efficiency
- Higher flow rates
- Better dirt-holding capacity
- Stainless steel core
- 100% food-grade polypropylene media
- Cost-Effective

The SWH cartridges are constructed from virgin polypropylene micro-fibre media with a strong steel core. The string-wound construction results in larger void volume that provides excellent flow characteristics with low pressure-drop and high efficiencies.

The SWH cartridges are constructed from virgin polypropylene micro-fibre media with a strong steel core. The string-wound construction results in larger void volume that provides excellent flow characteristics with low pressure-drop and high efficiencies.

### SPECIFICATIONS MODEL NUMBERS AND SPECIFICATIONS

Model	Micron Rating (Nominal)	Length (Inch)	O.D (Inch)	I.D (Inch)	Core Material	Cartridge Type	Max. Operating Temp
SWH1-5	1	10" (254 mm)	2.5" (63.5 mm)	1.10" (28 mm)	SS 304	Double Open End	200°F (93°C)
SWH5-5	5						
SWH10-5	10						
SWH15-5	15						
SWH25-5	25						
SWH30-5	30						
SW201H-5	1	20" (508 mm)	2.5" (63.5 mm)	1.10" (28 mm)	SS 304	Double Open End	200°F (93°C)
SW205H-5	5						
SW210H-5	10						
SW215H-5	15						
SW225H-5	25						
SW230H-5	30						

All dimensions are nominal

### HOT WATER FILTER HOUSINGS

Rainfresh ESS series stainless steel filter housings are ideal for use with SWH series

**ESS1:** Accommodates one 10" cartridge

**ESS2:** Accommodates one 20" cartridge
